- **English Language Centre Academy. Viso del Alcor. Full – Stack Developer.**
    - Divided in two parts. During this last summer, all related to front-end and static content related to describe what the academy can offer to customers and second part, in progress, for internal use.
    - Technologies used: Bootstrap 4.0, JavaScript, HTML5, CSS3, Oracle SQL, PHP 7.0.
    - Software: Apache Server, Visual Studio Code, Sublime Text 3.0 and MySQL Server 8 with MySQL Workbench 8
- **Spotygo.**
    - Project developed with Mrs. Reyes Cabello Holgado whose goal was saving a list of movies in a text plain file uploaded in Google drive.
    - Technologies used: Java 7, JSP & JSTL, Maven, Oauth2, API Rest.
    - Software: Eclipse Oxygen IDE.

My job area is web design.

This summer I have been practising the most Front – End and some about Spring Framework MVC 4 with Hibernate.

High Level Studies. Murillo Institute, Seville (2012 – 2014)

Software Engineer – Student. Seville University. (2014 – Now)

B2 – ISE 9 – Trinity College London. (December 2014)

Empathy

Working together

Active Listening

3rd Prize Hack For Good – Teléfonica (2015 – 2016). AlertArt.

This project was intended to be for commonly used. You find a sculpture is not in good state and you make a photo which is sent by the system to the local council.

HackForGood

4th Prize. Hack For Good – Teléfonica (2017 – 2018). Medispenser.

This project is made for people who has a continuous dependency of taking pills due to their medical treatments. It´s helpfull for people who don´t remember exactly the time when they have the next shot.

About me

I´m one of the multiple members dedicated in the centre to the student´s representation.

For 5 years (including the present), I´ve been spending my time in all kind of problems like: Problems bewteen teachers and Student, Infraestructure, Administration, Associations management and futhermore.

During this time, I have learnt the most how to work in group and the way I can keep growing up my personal character and attitudes.

I consider I should be accepted for this project because I have got used to work in groups without worrying on the topic or the job to get done. During this five years, I have also been working doing some courses, the most this last. Check my LinkedIn for more information.

Seville, 15th October 2018
